Profile

I am a Front-End Developer with a strong passion for building modern, responsive, and high-performance web applications. I earned Front-End Development Certificate from **Root Academy**, where I developed a solid foundation in creating seamless and user-friendly interfaces. I specialize in working with React and Next.js, leveraging their flexibility to build scalable and maintainable applications.

Projects

➤ E-commerce Web Application

Developed a fully functional e-commerce platform using **Next.js** featuring a modern responsive UI and reusable components. Implemented product catalog, shopping cart, and secure checkout system with smooth state management. **Applied Server-Side Rendering (SSR)** which improved SEO rankings and reduced average page load time enabling the platform to handle more than 2,000 products efficiently.

➤ Social Media Application

Developed an interactive social media application using React.js, Tailwind CSS, and Vite, ensuring a fast and responsive design across all devices. I added authentication features, post creation with image upload and editing capabilities, and instant comments for seamless user interaction. I used **React Context** for status management and **React Query** for managing API data for posts and user profiles, efficiently handling caching, upload statuses, and instant updates.

Front-End Development(HTML, CSS, JavaScript, React.js & Next.js), Route Academy

Technical Skills

HTML5 | CSS3 | JavaScript (ES6+) | React.js | React Router | React Hooks (useState, useEffect, useContext) | Context API | Next.js | SSR | SSG | ISR | Middleware | Bootstrap | Tailwind CSS | Framer Motion | Git | Postman | GitHub | NPM | Vite | Validation (React HookForm+Zod)

Courses

- Front-End Development(HTML, CSS, JavaScript, React.js & Next.js), Route Academy.
